Email: schumact@gmail.com

To Whom It May Concern,

I am interested in a full-time Senior Software Engineering position focused on server side development in either C/C++ or Java in a Linux environment.

During the past six years with my current employer, I acquired a broad skillset that makes me an ideal candidate for such a position. I am involved with every aspect of web application development with Java as well as Linux system programming in C/C++. As the sole maintainer of a web application used in a piece of IT equipment, I am in charge of client-side development, server-side development, nightly builds and deployment of the application.

In addition to an in-depth understanding of software, several years of teaching mathematics at the college level show that I can effectively communicate technical ideas to others.

Enclosed is my current resume. Also, I maintain a personal server as a hobby that has other information about me at:

<http://timmy.TransientRants.com>

Feel free to send me an email if there are any specific questions to be addressed.

Sincerely,

Timothy J. Schumacher, Ph.D.
