Senior Java Application Developer
Reference Number: JS-389734-B/4793604
Dublin, Ireland

To Whom It May Concern,

I am writing to apply for the Senior Java Software Engineer position posted on jobindublin.com.

During the past 6 years with my current employer, I acquired a broad skillset that makes me an ideal candidate for this position. I am involved with every aspect of web application development with Java. As the sole maintainer of a web application used in a piece of IT equipment, I am in charge of client-side development, server-side development, nightly builds and deployment of the application. In addition, we use Apache Tomcat so I have extensive experience configuring and deploying applications with Tomcat. I am also familiar with RESTful web services as I have written a REST application from scratch as well as used the Apache Struts REST capabilities and also have experimented with Sun's JSR 311 implementation (Jersey).

Although I am currently residing in the U.S., I am looking to move to Europe as I have a family member there. Ideally, I would look for a 1 to 3 year commitment.

Enclosed is my current resume. Also, I maintain a personal server as a hobby that has other miscellaneous information about me at:

<http://timmy.TransientRants.com>

Please let me know if there are any other materials or information that will assist you in processing my application.

Thank you for your time and consideration. I look forward to hearing from you.

Sincerely,

Timothy J. Schumacher, Ph.D.
